

## Sofaer Global MBA

# Propel Impact Design Entrepreneurship Lab

1238.3668

## Module 1&2: 2021/22

### Course Section Details

Section	Day	Hour	Lecturer	
Class	Tuesday	14:00-18:00	Rebecca Sternberg Tamar Many	<a href="mailto:rebecca.sternberg@gmail.com">rebecca.sternberg@gmail.com</a> 0528221582 <a href="mailto:tamarm@shenkar.ac.il">tamarm@shenkar.ac.il</a> 0522997635

Course TA: Hanna Gutwilen  
Office Hours: by appointment

### Course Units

2 course units = 8 ECTS units

\*The ECTS (European Credit Transfer and Accumulation System) is a framework defined by the European Commission to allow for unified recognition of student academic achievements from different countries.

### Course Description

*Propel Impact Entrepreneurship Lab* is a semester-long course designed for interdisciplinary GMBA and design students. Invoking business skills and design thinking methodologies, students will develop innovative services aimed at solving prescient challenges.

The course will convene around a key theme to design ventures with potentially impactful paths towards the market. In a lab environment, students will actively engage in real-world problem solving, based on real-world data to promote real-world impact, around a central behavioural challenge.

*Propel Impact Entrepreneurship Lab* project-based learning will focus on ideation, impact business models, entrepreneurial skills, teamwork and communication needed to transform challenges into opportunities and develop innovative approaches that demonstrate the potential for measurable, sustainable economic, social and environmental impact.

Each year, the *Propel Impact Entrepreneurship Lab* will interface with a network of academics, industry experts, thought leaders, partner organizations and community members who serve as a real-world context for projects. Additionally, students will gain introductory exposure to relevant technologies and innovative business approaches surrounding the semester's theme:

### **1. Explore**

Gain experience collecting multiple data points to uncover needs, opportunities and new understandings surrounding the challenge theme. Map, visualize and analyze data, elicit insights.

### **2. Design**

Working in teams, design a venture related to needs and opportunities surrounding the key theme: delineation of the requisite data, service ideation, user experience, business model, minimal viable product (MVP) based on a driving behavioral approach and a dedicated impact model.

### **3. Propel**

Present the impact venture, including service naming, content delivery, communication and delivery, alongside preliminary user or market validation.

## Course Objectives

With the successful completion of the *Impact Entrepreneurship Lab*, students will gain hands-on experience in the following key areas:

### **1. Data analysis and representation:**

- a. Ability to collect qualitative and quantitative information from a wide variety of data sources and types.
- b. Data analysis and visualization and mapping; ability to cross-reference and interrelate data across multiple vantage points, through data representation and information design.
- c. Conceptualization of data-driven needs and challenges into opportunities.
- d. The capacity to look deeply at a space and create new insights and understandings.

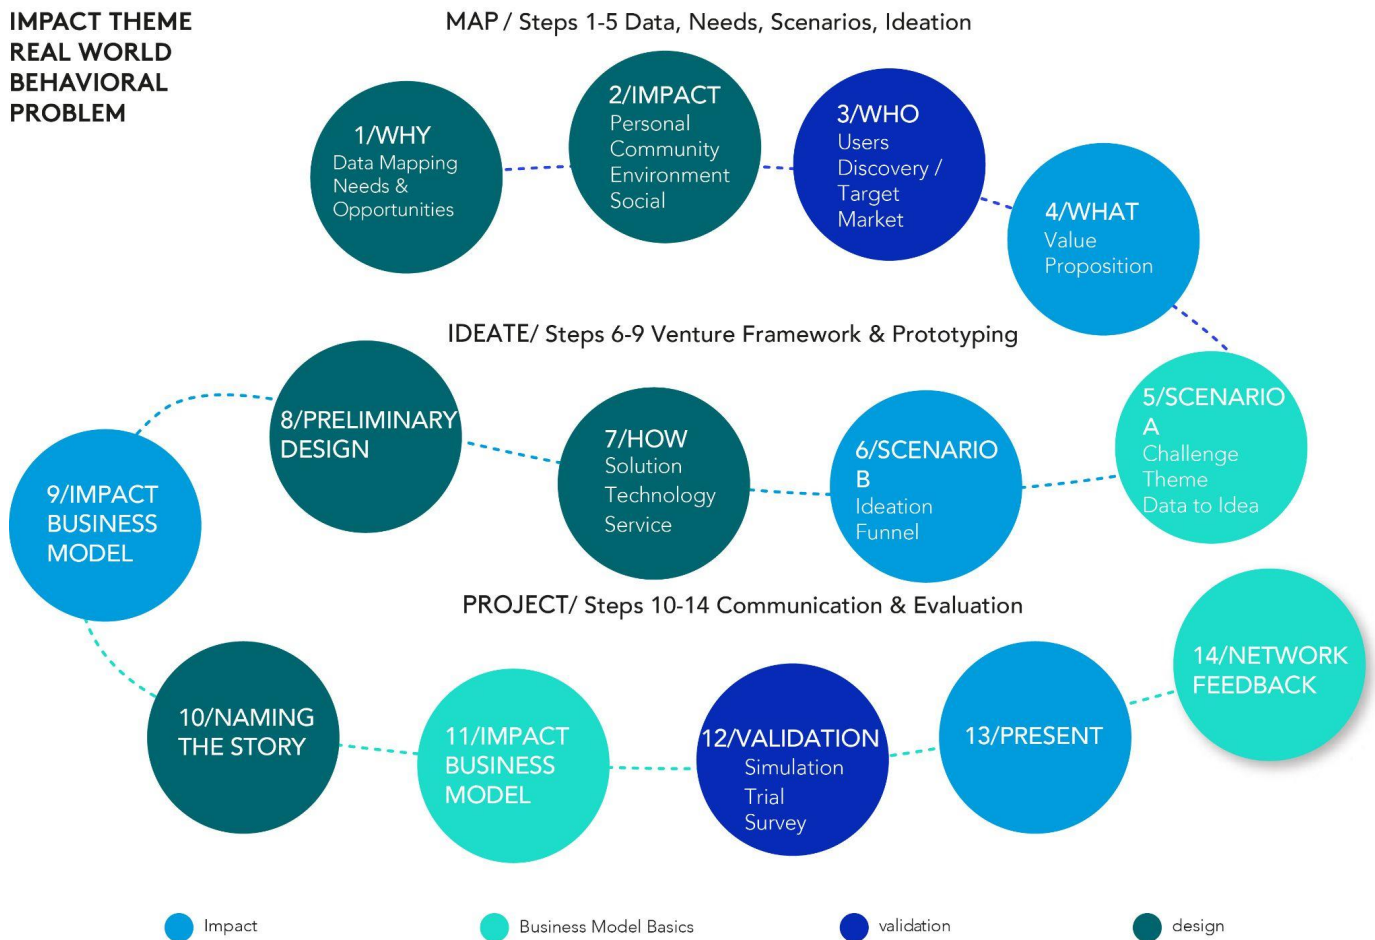

### **2. Scenarios and impact models:**

- a. Ability to define goals and scenarios grounded in data.
- b. Venture ideation derived from scenario objectives, innovation paths and behavioural goals
- c. Development of venture impact model and case studies

### **3. Impact ideation, preliminary design and communication:**

- a. Ideation of a venture to achieve product/service goals.
- b. Service prototyping and validation of technology, user and market assumptions
- c. Naming, communication and presentation

- d. Sustainable business models
- e. Impact and performance metrics for systemic change

**2021/22 Theme - @Work**

**2021 Theme:** The Propel Impact Lab Theme for 2020/21 is “@Work”

**Challenge:** The future of work is now.

Digitalisation and globalisation have sparked radical shifts in how we live and work. The coronavirus (COVID-19) crisis has accelerated these beyond anything we could have imagined. Artificial intelligence, hybrid human-machine collaboration, automation and robotics, will make this shift as significant as the mechanization in prior generations. Demographic shifts - lower birth rates, longer lifespans, migration across economic divides, growing pay gaps, changing attitudes towards work life-balance, and the expansion of the workforce to include both on-and off-balance-sheet talent, are all changing the nature of work itself.

**How can we usher in a new age of work by radically reimagining our workplaces, work models and workflows to be at once more equitable and more productive?**

Propel Impact Entrepreneurship will focus on changes that can drive the future of work. @work will explore and map accelerated trends and new impacts on work-life. Based on a data driven approach, students will ideate new behavioural service approaches to shape a fairer, more digital, higher quality, flexible and resilient reinvention of work into the future. We will propose designs, services and business models that offer measureable, impactful results to address the future of work.

## Course Assignments

Students are required to participate in all class meetings, including lectures, workshops and studio. Students must meet all assignments during the semester as well as mid and end of semester submissions.

Evaluation of Student Performance and Grade Composition

Percentage	Assignment	Comments
5%	Attendance and active participation	The grade will consider the process, personal contribution, participation and team-work as well as the quality of the final deliverable
15%	Data Analysis and Mapping	
20%	Midterm Scenario & Ideation	
25%	Formulation and Design of Venture	
35%	Final Presentation & Submission	

\* According to University regulations, participation in all classes of a course is mandatory (Article 5).

\*\* Students who absent themselves from classes or do not actively participate in class may be removed from the course at the discretion of the lecturer. (Students remain financially liable for the course even if they are removed.)

\*\*\*Evaluation of the Course by Student. Following the completion of the course, students will participate in a teaching survey to evaluate the instructor and the course, to provide feedback for the benefit of the students, the teachers, and the university.

## Course Assignments

A major vehicle for learning in the course is a real-world impact challenge and project-based learning.

Students who are unable to complete an assignment or course requirement must notify the TA of the course in advance via email

The Impact Challenge selected for the Fall Semester of 2020-2021 To:Health

Students will work in interdisciplinary teams, made up of three business students and up to two designers.

Assignments will be submitted to a shared drive before each due date.

The lab format of the course is based on peer-to-peer learning.

Effective participation includes: (1) providing insightful questions and comments on concepts from lectures and readings; (2) sharing your experience or point of view with the class; (3) building on points raised by others; (4) clarifying issues; and (5) relating ongoing topics to previous class discussions.

### Grading Policy

As of the 2008/9 academic year the Faculty has implemented a grading policy for all graduate level courses. This policy applies to all graduate courses in the Faculty, and will be reflected in the final course grade. Accordingly, the final average of the class for this course (which is a core course) will fall between 88-90.

Additional information regarding this policy can be found on the Faculty website.  
<https://coller.tau.ac.il/MBA-students/programs/2019-20/MBA/regulations/exams>

Design students will be evaluated based on the Shenkar Engineering.Design.Art grade scale.

### Evaluation of the Course by Students

Following completion of the course, students will participate in a teaching survey in order to evaluate the instructor and the course for the benefit of the students and the university.

### Course Site (Moodle)

The course Moodle site will be the primary tool used to communicate messages and material to students. It is therefore recommended to periodically check the course site, in general, before each lesson, and at the end of the course as well. (For example: exam details and updates regarding assignments)

Course slides will be available on the course site.

Please note that topics which are not covered in the slides, but are discussed in class, are considered an integral part of the course material and may be tested in examinations.

A dedicated shared drive will also be established for project-based learning.

## Course Schedule / Wednesday / 14:00-18:00 PM

<b>Week 1</b> <b>12.10.21</b>	<b>Course Introduction</b>	<table border="1"> <tr> <td data-bbox="614 461 874 562">14:00-14:45</td> <td data-bbox="874 461 1305 562">Overview of Propel Impact Lab format/theme</td> </tr> <tr> <td data-bbox="614 562 874 663">15:00-15:45</td> <td data-bbox="874 562 1305 663">Student/Lecturer Introduction (outside/inside)</td> </tr> <tr> <td data-bbox="614 663 874 801">16:00-16:45</td> <td data-bbox="874 663 1305 801">Why Behaviour?
